Student of the Week: Claudia

Hi I'm Claudia and I am seven years old. This is my fourth year at Mandala! My family is mom, Judah, and dad. I have two parrots and a cat, Billie. I don't have a role model. If I had one wish, I'd wish for more wishes. I want a mansion with a hot tub. If I could have any job I'd be a teacher. I would want every super power, not just one! Now, for my favorites: food: fake sausage. movie: The Grinch. Book: A Tea Set for Francis. Country: Australia. Video game: Mario Kart. Animal: cats. Class: Writing & French.

In school we are doing current events. We each have to pick a current event and present it during morning meeting. One of the current events I heard was about how Tesla, a car company, makes their cars. They use 160 robots and 3,000 men. My current event was about two men who are trying to go across Antarctica entirely without any help. I will be over 912 miles! I am interested in hearing what people have to share next week I hope it is exciting.
-Jackson M

Damon reading a book to the younger students. They are great listeners!

In French this week we learned numbers 20-100. We also played games with numbers. Then we reviewed shapes, colors, foods. Banana is une banane. -Justin

This week in music I played the piano. I played Twinkle Twinkle. We all played on a paper piano too. -Sia

I personally do not know what would be a perfect diet but I do know what you have to eat the most of and what you have to eat the least of: for example you have to eat mostly vegetables, fruits, non-animal protein, and nuts. You should stay away from sugar, too much dairy, too much sodium (salt) and too many carbs. I don't eat as many types of vegetables as I should but my goal is to try more things.
-Marty

Younger students made posters representing different food groups that we should have daily: protein, fruit, and vegetables.

Molly McTrickster
By Claudia

Molly is an 11 year old girl. Her last name is McTrickster but she's not a trickster. Her best friend is Annabelle. Both girls live in Florida. Molly goes to middle school and so does Annabelle. Now, on to the story! "Mom!" Molly said.

"Yes?" Molly's Mom said.

"When will Annabelle be here because today is my birthday!" Molly asked, "Can we pick her up?"

"I'll text her mom hunny bun!"

Molly said, "I'll go play outside on the trampoline."

"Ok!" Molly's mom said.

Molly went out on her trampoline.

Two minutes later

"Molly!" Molly's mom said, "We can pick up Annabelle."

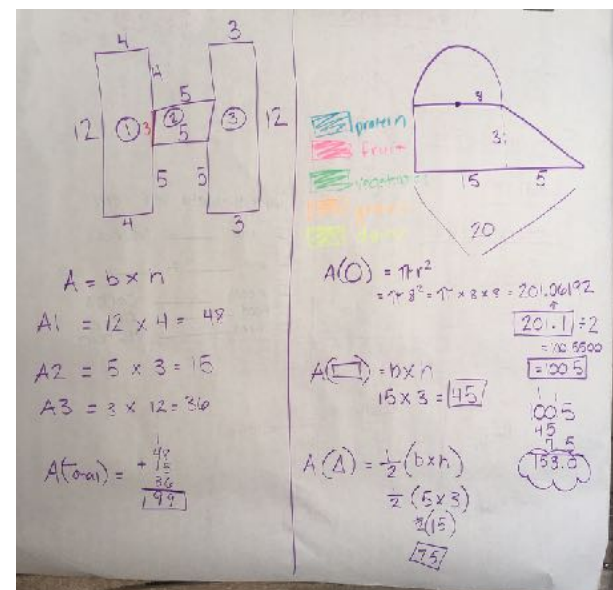

"YAYYYY!" Molly said. Molly and her mom drove to Annabelle's house.

15 minutes later

"We're here!" Molly said. When Molly and her mom got to Annabelle's house, Annabelle's mom said, "Hi Deborah to Molly's mom."

Then Molly's mom said, "Hi Elexi to Annabelle's mom. After Deborah, Molly, and Annabelle got out of the car they had a birthday party for Molly.

The End

In math this week the middle group we learned how to find the area of a bunch of shapes INCLUDING pi r square (and no not the pie you eat, the math kind). How to find the area of a triangle? Easy say you base is 6 and your height is let's say 3. So you do $6 \times 3 = 18$ then you do your answer that got from your height and base obviously, then divide it by 2 and boom you have your answer for a triangle. [you do not need to use the numbers I did]. -Luciana V.

Left: Student led yoga class during rec. Below: Sia petting Ethan's pet pigeon, Pidgy. Ted gives an early morning rock concert during meeting on Friday. Bottom: Claudia's French presentation about buying food, & Damon & Jackson shopping for our healthy lunch on Friday.
