Volume XI
Issue VII

Student of the week: Michael

How old are you? 12
Are you a rookie or a vet? vet
Who is in your family? mom dad and me
Do yo have any pets? two cats
Do you have a role model? dad
if you had one wish what would it be? To work in Florida
if you could do anything what would it be? be a teacher
if you could have any job what would it be? To work at Lowes
If you could have any super power what would it be? Magic
Michael's favorites:
Food: Fries
Book: *Nate the Great*
Toy: Legos
Activity: Play on switch
Hobby: building Legos
Dinosaur: T-rex
Movie: Lego Batman
Country: Australia
Video game: Lego Star Wars
Class: Art
Animal: manatee
Color: blue

Interviewed by Claudia & Keltrian

We will celebrate Halloween on Wednesday. Students may dress up or bring their costume to school. If you'd like to send a treat to share that would be great!

As we enter "sniffle season" we ask that each family brings one box of tissues for the school!

Left: Keltrian teaching Justin subtraction in the thousands.

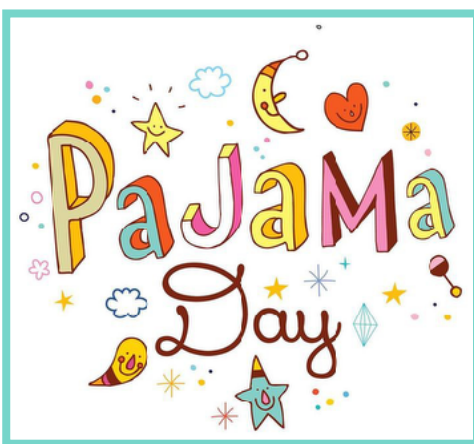

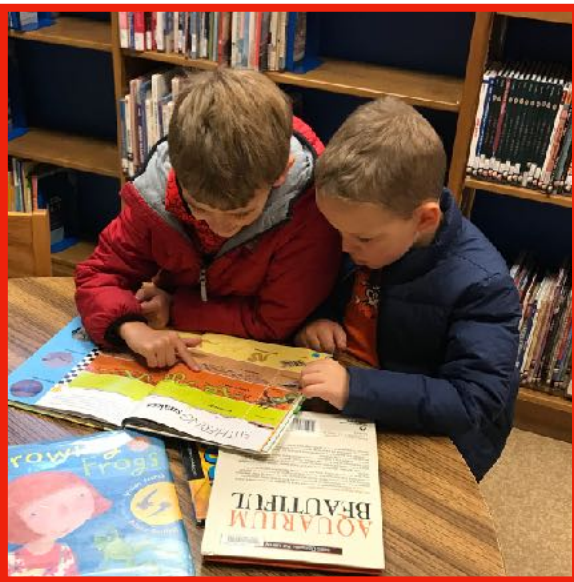

Witches potion challenge was a fun experiment including five different ingredients like baking soda, vegetable mix, colored water, vinegar, etcetera. The goal was to get the potion to bubble with the minimal ingredients possible. It was split up into four opposing groups. My group won by sniffing the ingredients and found out which one was baking soda and which one was vinegar. It was a lot of fun I really liked it. By: Martin Cohn

Tuesday, November 6th

The Rock Cycle
The rock cycle is the process that rocks change. For example to become a metamorphic rock it has to have heat and pressure. If you want to have a sedimentary rock you have to have compaction and cementation. To become an igneous rock you have to melt into magma then cool down. To turn into sediment you have to have weather and erosion.
-Damon

Finn & Ethan reading about snakes

Miss Leah reading a Halloween story to the students at the EA library

Students first book report will be due
Wednesday
December 5th

French is my favorite subject we learned how to say the numbers, the days of the week, and places. Lundi, Mardi, Mercredi, Jeudi, Vendredi, Samedi, et Dimanche are the days of the week.
—Devin

This is a project that encourages independent reading. More info will be given to students at school.

This week we started to 3D print!! We can make designs on a website called Tinkercad. To start you take a little tutorial. Sandrine, a woman from France who now lives in the US, comes to help us on Fridays. The latest thing I designed was a character I call "3D Me"

— Jackson M.

Fairies

*Fairies are pretty, there also sparkly
They live in trees with pixie cuts,
they fly in the air with magic dust,
with wands stuff happens
like sunshine and
Fluff*

By Claudia M

In math we're doing area. We are finding the area of triangles and rectangles. Area is the space inside a shape. You can find the area of a square or rectangle by doing base times height.
—Keltrian

Area of a triangle is found by finding the base times the height and then dividing it in two.
