If you had one wish what would it be: To have more wishes
If you could do anything what would it be: Visit an army base
If you could have any job what would it be: Police officer
If you could have any superpower what would it be: To turn invisible

The Basement by Keltrian

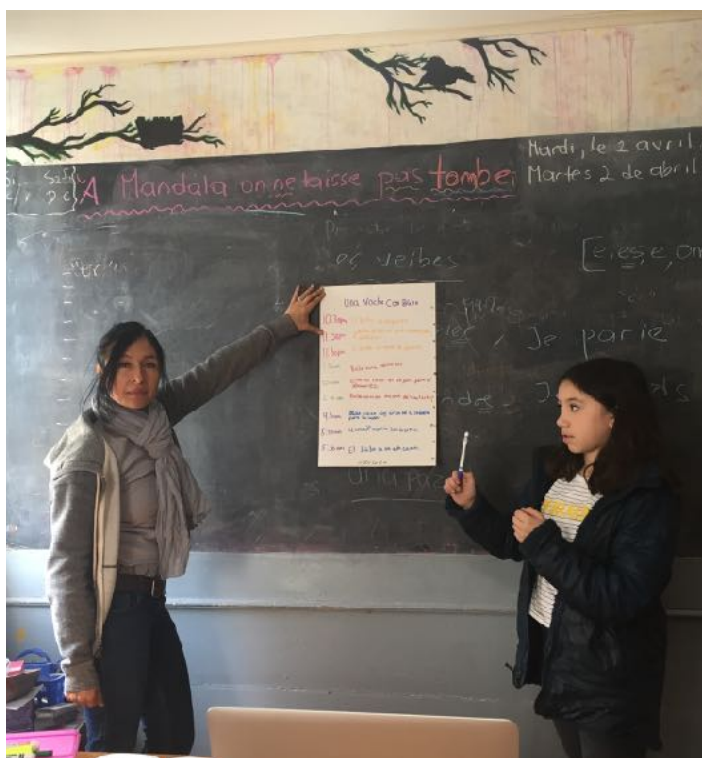

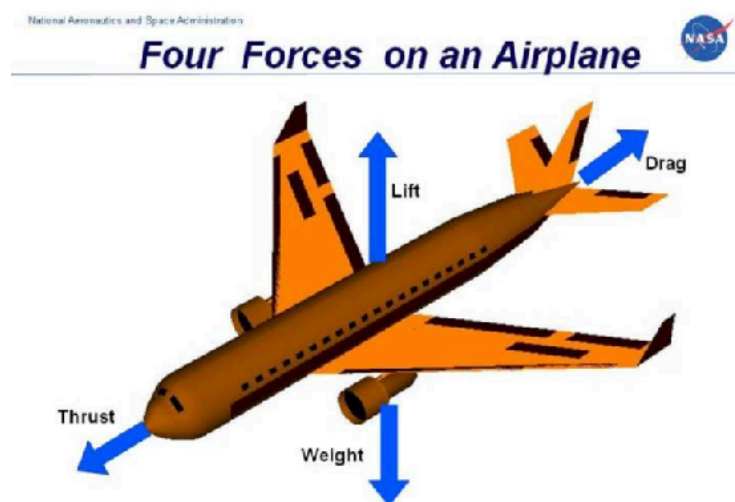

Hi, I'm Keltrian. I know this is weird but I'm not a human. I'm a spider. I know I'm a typing spider. I'm not a bad spider but if someone is trying to, I don't know, I guess trying to kill me, I will not be kind, yeah. I'm kind of a creepy spider.

I'm 10 centimeters long you think people see me but I don't want to creep people out so I hide when people come down. I don't know why people are scared, I'm a nice spider. I like the basement there's a room that's so dark, I go there, I love it. There are stairs I never go up. There's a big machine, I don't know what it is, but people put things in it, and that's what's in the basement. Bye-bye

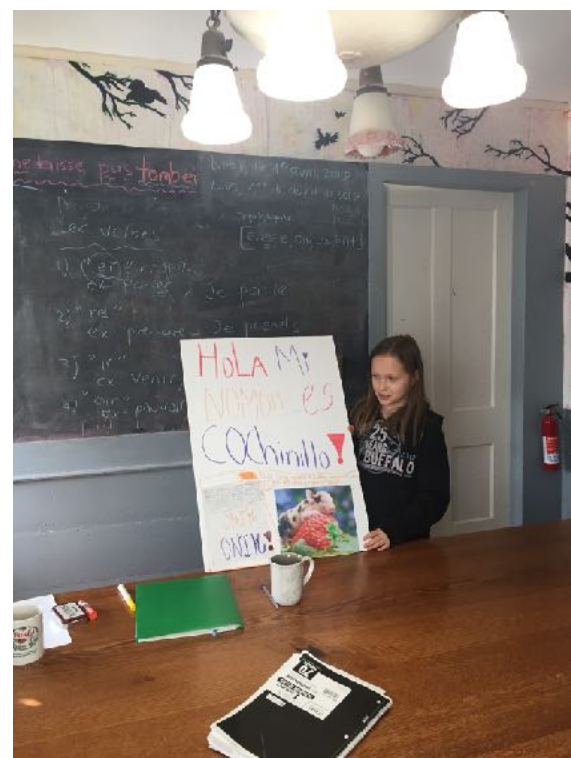

Miss Leah's dad came in and taught us about airplanes. We learned about the forces you have to take into account to make a plane fly: weight v. lift, drag v. thrust. We also learned how the shape of a wing matters and how the panels on the wing help the plane fly. The panels are down when the plane starts moving, so the air can be pushed down. Then, when it gets air the panel is straight. Then when it lands the panels go up so the air gets pushed up and the plane gets pushed down.

By Jackson M.

In Spanish class, the students made projects about animals with a daily routine. Kate's project was about a pig named Piglet.

This week we began a new unit: Geography! Older students started learning about the United States while younger students started with the five oceans.

The Adventurous April By Claudia

Hi! My name is April and i'm 12 years old,. I live in Australia with my family of 6, my mum, my dad, my 2 brothers, my sister and me of course. I like going to the park after school with my friends! After I do that I usually just play board games.
