Charlotte & Omi smiling on St. Patrick's Day

Sachin & Nolan have been working with Dr. John to construct a solar cooker. We can't wait for a sunny day to try it out! Their creativity and sharp minds make an excellent team!

Student of the week: Sachin

Sachin is a smart, energetic mathematician. Right now he is working on a parabolic solar cooker in math with Nolan, Dr. John, and Omunique. He is a detailed worker and creates beautiful art. His worry doll weaving was spectacular. Sachin never stops thinking! "I bet he does the golden ratio in his sleep" says Nolan. Even though he is a very focused student, he can also be silly. His laugh is contagious! Mandala loves Sachin!

Written by Nolan

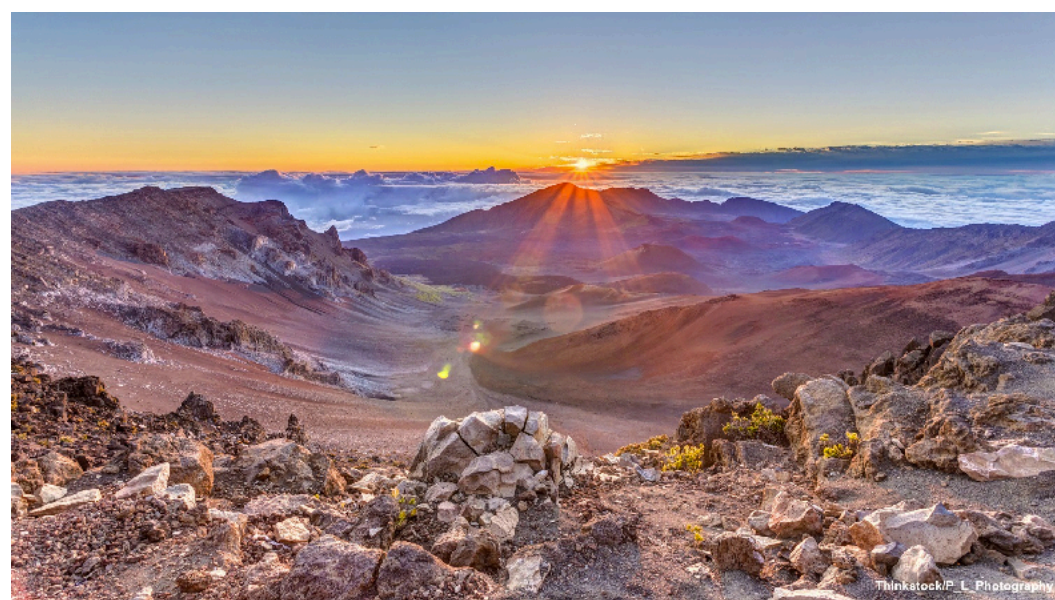

Here are a few questions we asked him:

1. Why do you like Mandala? *I like it because it is a smaller school. We do not have desks and I can be in a higher math class.*
2. What's your favorite thing to do? *Math.*
3. Who's in your family? *Ria, mom, and dad.*
4. How old are you? *8.*
5. What do you like to do in your free time? *Make up games.*
6. Do you have any pets? *I have 1 cat, 3 fish, and 5 chickens.*
7. What is your favorite food? *Ya, (it is a rice wrap that you place in water that you put food in).*

Kate holding her Haleakala National Park poster. The middle school students have been studying U.S. National Parks. Their projects were due this week and there were many great posters and presentations!

Reminders:

- ✱ Our final book report is due on May 4th! The author or protagonist of the book should be a minority!
- ✱ Summer camp registration is open and all three weeks are filling up! Early bird pricing ends March 31st
