## Student of the Week: Bryce

Bryce is very good at playing doggie. He is a good friend because he is kind. He is very nice and thanks for letting me play puppy orphans with you! Bryce makes me laugh. Bryce's favorite color is

red. He loves winter because there are no bees. Bryce's favorite food is pizza with cheese and for a treat he likes Kit Kats. Bryce has been on the Polar Express and claims to have been to the North Pole. He absolutely LOVES the Bills. His favorite player is Josh Allen because he is the quarterback. Bryce likes to watch Star Wars. He was even Kylo Ren for Halloween! Bryce is quite the reader. Right now, he is enjoying the MagicTreehouse series. School just wouldn't feel the same without our buddy Bryce!

We are learning about our five senses.

"We smelled and we couldn't look. We smelled peanut butter and orange and vinegar. My favorite smell was the orange. We used our nose to smell" -Inti

"We felt shaving cream and glue. The shaving cream feeled like wet slime. The glue was so slimy, probably slimy as a slug. The one I liked the most was touching the shaving cream." - Georgie

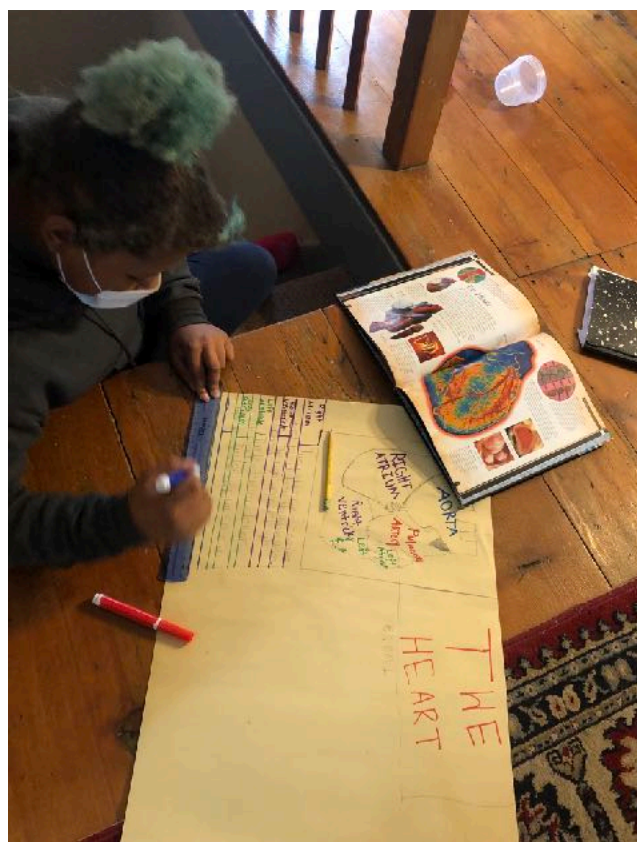

Interview by Emilia, Georgie, Flora, Aurora, Frankie, Inti, and Ama

### Effective Communication

Today, in kindergarten and first grade we talked about communication. We need to use kind words when we want to tell someone something. This is hard to do when someone is making you mad or frustrated, like when they take a toy from you. Communicating with kindness is hard with your sister and brother, too. But if we do effectively communicate things are better.

We are learning about the human body. Everybody is learning about the organs. Some of them are intestines and your brain. Omi is researching the heart, Graham is researching organs and the bones, and Sachin is researching the immune system. Charlotte and Kyle are working on blood types.

  3. Running club of the season will meet on **Friday** next week. Please pick-up at 3:45pm @ Hamlin Park.
  4. Book Reports are due November 18th

Ella cleaning away this morning!

In math we started measuring. We measured the bookshelf, the door, the square table, and we measured the pumpkins. We use a measuring stick. We have measured in inches, pounds, and feet. Pounds measure weight. Inches and feet measure how long something is. We also measured using our hands and feet. We measured the table, the black mat, and the entire room and the Lego box.

By Georgie and Graham.
