How I Lost My Two Front Teeth

I fell down on my bike and fell into the grass. Then, I went in the bathroom right after and I wiggled it and my mom came in and she said, "Is your tooth wiggly? Let me feel it." She wiggled it and they were looser. We did the "olden-times" door trick with the floss and they both came out! The toothy fairy came and I got two dollars!

By our student of the week, Georgie

We painted with apples because it's fun! Red, brown, purple, orange, blue are the colors we used.

Georgie is seven years old. He has two siblings, Katie and Elena. His favorite color is blue and his favorite animal is a tiger. His favorite place he's ever traveled to was France, and his favorite part was the Eiffel tower. The baguettes and the crepes were the best according to Georgie. He has a cat and a dog named Yawyaw and Teddy. His

favorite subject is math because it's fun! Georgie hates cleaning his room. His favorite food is apples, and doesn't like vegetables: his least favorite food is tomatoes. His favorite Mandala room is the primary room. His favorite language to learn is French. If he could have one superpower it would be to fly and his favorite sport is basketball. If Georgie could tell everyone in the world one thing it would be his name. *Why?* Georgie says: That way everyone could know me more and then I could tell them more about myself. Georgie's best friend, Inti, says Georgie is good at math and he's intelligent. He's also sneaky (in a ninja kind of way) and he's fun to play with! By Bryce & Sarah

Music class by Ama

In Music class we listened to music at the beginning. It was called "Eine Kleine Nachtmusik" by Mozart. There was violin, viola, and cello. It was fast and then it got slower. It sounded happy. After that we practiced steady beats. We clapped, stomped, snapped, and patted knees. Lastly we started making rhythm charts. We drew whole notes, dotted half notes, half notes, quarter notes, eighth notes, whole rests, half rests and quarter rests. Here's mine:

Tuesday was the first running club of the year. When we got there we went to the field at Warren park and stood in a circle. We went around and everybody said a stretch that we would do. Then we ran around the field once. After that we played duck duck goose and freeze tag. After that we choose people who were the same age. Running club is every Tuesday after school!

how low can you go? Limbo at rec

In math class we learned about addition, subtraction, multiplication, and division. We solved word problems.

We also learned how to figure out how many ones, tens, hundreds, and thousands in big numbers like 3,227. There are 3 thousands, 32 hundreds, 320 tens, and 3,227 ones.

By Kyle

In art class we did self-portraits based off of Picasso. The older kids looked at books with Picasso paintings in them. We used pastel paper and markers to draw them. We used mirrors to look at ourselves to draw them to.

The little kids painted pictures of the sunflowers that Ms. Jeanette brought for them. They used clothespins in paint to make the seeds. The artists are Juniper (top left), Hazel (bottom left), Georgie (top right), and Inti (bottom right).
