Making Bagels

We used flour, yeast, eggs, and water. We had to keep adding water as we went. Once we mixed together everything it was super tough so we had to knead it in the bowls.

When they were ready we put 4 bagels at a time in boiling water for two minutes on each side.

We seasoned some with an egg brush, some with everything seasoning, and some with cheese.

And then we baked them for 20 or 25 minutes at 350. Then was homemade cream cheese, made out of yogurt, plain and pepper, grape jelly, and butter. The grape jelly was not good.

Ama and Sophie learning perimeter in math this week

Announcements & Reminders

- Next week we will deliver holiday cards to local businesses throughout East Aurora. Please send appropriate clothing for the cold!
- We are still collecting non-perishable items to be donated. We will deliver them on Tuesday 12/19! Thank you so much who has generously
- Our Winter Break begins on Wednesday 12/20. We return to school on January 2nd!

We've been learning about all sorts of graphs. Georgie, me, Juniper, and Hazel are learning about graphs. There are pictographs, line graph, bar graph, and pie graphs. We made a bar graph with colors of M&Ms. I had mostly oranges and reds were the least. By Inti (left)

At the library I found some books. It was a horse book. We gave the library a card and some cookies. I made the card. By Hazel

My group read *Lincoln*. It was about Abe Lincoln and his life. Abraham Lincoln went from a tiny log cabin to the White House. It took us a long time to read the book, about a month. He was born from a slave state but he thought slavery was really bad, and it is really bad! He became the President of the United States and he fought against the south to try to stop slavery. And it worked! By Georgie

Student of the Week: Clara

Clara is a great Mandalian. She is eleven years old and loves green. She loves how Mandala is more free than other schools. Her favorite subject is writing. She likes writing creative stories.

Clara lives with her mom, dad, sister Amelia, and her two dogs, Remmy and Bella. In her free time she likes to dance and read. Clara started dance classes when she was three years old. She azz, tap, ballet, theatre, stretch and tech. If she could go to one place in the world she would go to the Netherlands and Poland. Clara likes to read Harry Potter and watch Baking Impossible. When she grows up she wants to be a mom with two kids, both girls. Her favorite stuffies are Jack Jack from incredibles and fudge a white dog. Clara likes to eat ice cream and chocolate. She is smart, funny and very good at geometry. She is a great person. By Elena

In art we are making cards, when you open them they have 3D objects inside them. Inside mine is a bathtub. I chose a bathtub because I thought it was creative and I'd like to see bubbles coming out of the card.
