This week in math we have been doing percents. A percent is basically a fraction. To find 20%, first you find 10% by moving the decimal to the left one spot, which is the same as dividing by 10. Then you times whatever number you have right now, by 2, to get 20%. To get 30% you'd times it by 3. So then we started dividing 10 by 10 and finding 1%, 5%, and 8%.

48% is 0.48

By Bryce and Miss Kelsey

Moving right along onto our next explosive topic, volcanoes! Inti wanted to learn about volcanoes, so volcanoes it is! So far we have 4 vocabulary words: *ash*, *lava*, *magma*, & *eruption*. We are reading a chapter book: *The Magic School Bus: Voyage to the Volcano!*

We learned about volcanoes. We learned about a lot of volcanoes and what they do. The black part of the bracelets are real lava rocks! We made them. That's all. By Juniper.

Walking to the park... finally some nice weather!
