Student of the Week

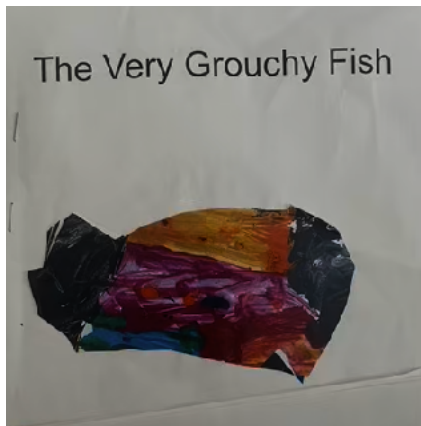

Brooklyn is a 13 year old student at Mandala. She loves to play hockey. Brooklyn has been playing since she was nine. She spends time at the rink about three times a week. In her free time (other than hockey) Art and spending time with her animals are first choices. Brooklyn also enjoys traveling. Somewhere she would like to visit is France and Sicily, Italy. Her favorite mandalians are Stella and Vienna. Brooklyn's favorite class would be art. At school Brooklyn is a great role model for the younger kids. Brooklyn looks up to her older brother and sister. After eighth grade she doesn't quite know where she's going but she might go to Frontier high school. Mandala will definitely miss her!

Reminders:

- * If you have not filled out the Waiver & Acknowledgment form for the Boys and Girls Club please come in on Monday and complete the form.
- * We are off next week Wednesday, 11/26 to Friday, 11/28 for Thanksgiving Break
- * Our annual harvest meal is next Tuesday, November 25th. We will cook and eat a meal together for lunch. Please still send in a snack!
- * Please email Kelsey, John, or Leah if you would like to schedule a parent-teacher conference.

Our authors and illustrators shared their books this week!
They all received an award for their hard work.

- ❖ Left: Petey sharing his cover art for his book, *Spooky Bear, Spooky Bear, What Do You See?*
- ❖ Top left: Gabriel's cover of *The Very Grouchy Fish*
- ❖ Top center: Ryo proudly holds his Author & Illustrator award for *The Very Hungry Cat*
- ❖ Top right: Juniper's cover art for her book: *The Very Bad Bat*

For art class we did pumpkins with chalk pastels. We also made leaves for the harvest meal. We color one section of the leaf and draw the veins. Then we color the next section. We use a sharpie to write down five things we are thankful for. I am thankful for my momma, my dadma, my doggie, my grandma, and Hazel. By Juniper

In music we studied the three sisters. They are corn, squash, and beans. We also practiced singing *Somewhere Over the Rainbow* and *My Favorite Things*. By Winter

In math we are learning multiplication. We draw pictures with dots. We draw the dots in rows. Today we did six three times. It equals 18! Ms. Erin gave us a number and we had to split it up into smaller numbers to make a fact family. We are also doing addition and subtraction.
- Hazel & Zosia

If you borrow money from the bank you have to pay interest, which is a percentage of the money that you took out that is added on. The longer it takes to pay off a loan the more you end up paying.

Your money can grow with compound interest if you put it in a savings account or invest it. If you invest \$100 and a company is going to give you 7% a year. You would have \$107 at the end of year. Now you would take 7% of \$107. Your money starts to grow faster. Sometimes it is compounded more than once a year.

The formula for compound interest is $A = P(1 + \frac{r}{n})^{nt}$

A = the total amount you have

P = initial investment (principle)

1 = 100% of the current amount

r = rate (% added on)

n = number of times compounded per year

t = time in years

Friday Workshops
Today's offerings were
yoga and meditation,
lantern making,
turkeys, and baking!
Thank you Ali, Amy,
Chelsea, & Bonnie for
volunteering 🦃
